DIFFERENTIAL PRESSURE GAUGES AND MANOMETERS MM SERIES

Liquid column manometer for HVAC applications

The MM series liquid column manometers are engineered for HVAC/R applications. The MM series devices detect air and non-corrosive gas pressures (differential, vacuum and positive) and provide a clear analog display of the measured values. The MM series is designed with a reservoir to protect the manometer liquid from leaking into the duct during overpressure situation.

MM series device features include:

- field adjustable zero point calibration
- pressure limit stickers

The MM series device options offer:

level bubble

APPLICATIONS

MM series devices are commonly used in HVAC/R systems for:

- fan, blower and filter monitoring
- pressure and flow monitoring
- pressure monitoring in cleanrooms
